Being a Zimbabwean who is not a stranger to the struggles of a financially starved background, I grew up strongly believing that education is the key to achieving one's destiny. Having taught in many schools for a period spanning over 20 years, I have come to appreciate the need to help all children to acquire a decent education, regardless of their social or economic background. Upon this solid conviction, Destiny Achievers was born.

So at Destiny Achievers, we aim to equip our students and teachers with the necessary skills that will leverage them in their pursuit to fulfill their God-given purposes. We believe everyone has a divine mandate to accomplish, and as such, should be given the opportunity to pursue it.

In line with this objective, we have crafted a well balanced school program, one that is thoughtfully designed to produce a complete and competent person. Our school calendar is designed to keep both our students and staff busy and yet highly focused and motivated to achieve our individual and collective goals.

To make our students relevant in this highly competitive world, we at Destiny Achievers offer both a Zimsec and Cambridge curriculum through a wide choice of career-oriented academic and vocational subjects.

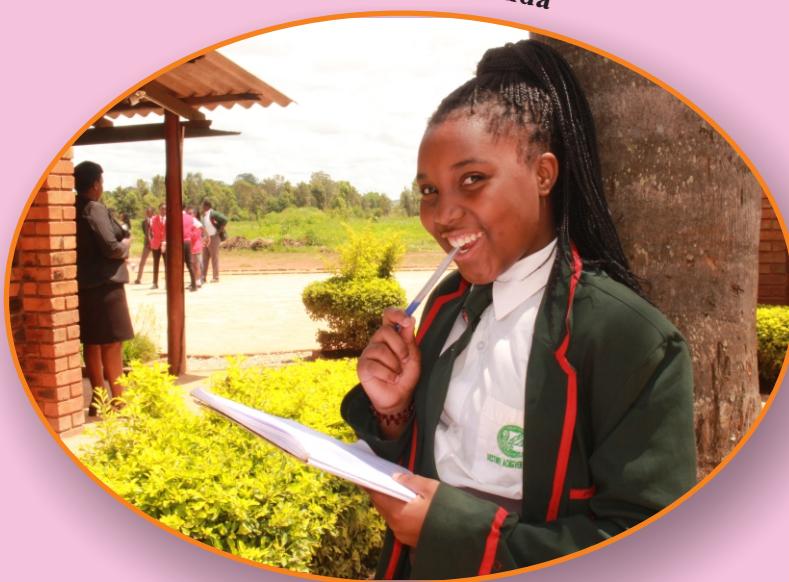

As an educational institution, we provide a curriculum that is both challenging and relevant to the diverse needs of the job market. Even to students who want to pursue entrepreneurial careers, our curriculum offers a relevant foundation.

Apart from the normal academic subjects that we teach on a daily basis, at Destiny Achievers we give our students life skills that are important for survival. We also impart psychomotor skills to our students so that they are capacitated to handle unexpected challenges that life brings from time to time.

So as we start the 2022 academic year, our minds are sharpened and our perspectives focused to execute our mandates. Working as a team, 2022 is definitely poised for great things. I am sure this newsletter will confirm my assertions.

Mufaro Chikanda

From The Editor

When it was made public within the school campus that the media team was going to publish the first edition of our school newsletter, the whole school was gripped by a dense atmosphere of anticipation. Our team members immediately jumped into action.

I would like to acknowledge the spirit of team work and focused concentration that brought us our first edition of this monthly publication. True to every word, this copy would not be in your hand had it not been the passion and determination of the members of the Destiny Achievers Media Team

The main objective of this publication is to educate our peers through a wide content coverage. In addition to providing educational information to students at Destiny Achievers, this publication aims to give students a platform to showcase their creative talents. We also aim to keep our parents well updated on the various issues as they happen in our school. A soft copy of this publication shall always be posted on our school website. So reader, enjoy your reading.

Meet the Destiny Achievers Group of Schools Media Team. It is a team composed of vibrant, talented and focused young people. This team is mentored by two teachers, Mr Mapuranga (extreme right) and Mr Muyambo (extreme left).

The Destiny Achievers Media Team is composed of students from Form one to Form 6. Each member has a role to play in the team, based on his or her special skills, passion and talents. Among the team members we have reporters, creative writers, content researchers, concept developers, artistic designers, graphic designers , photographers, video editors and editorial team. Our Teachers play the role of mentors and facilitators. In addition to this, they organize the training of new and old team members aimed at equipping them with relevant skills for the effective delivery of their duties.

OUR SCHOOL, OUR PRIDE

VISION

To be the leading Education Center in Zimbabwe and contribute towards the performance of learners in Maths, Science, Technology and Arts

MISSION STATEMENT

Our Mission is to provide an engaging educational environment which surrounds the child in a community of learners who acknowledge and believe in the unique yet dynamic nature of the human spirit and strive to foster and nurture the individual through meaningful and challenging opportunities in Maths, Science, Business and Communication while collectively experiencing a renaissance of the mind.

VALUES

- * High achievement for all
- * Excellence
- * Collaboration
- * Respect for individual difference
- * Educational Equity

The orientation Program

...At Ochi Safaris

At the beginning of every year we conduct an orientation program for all our students and staff to familiarize them with our school ethics, culture and values. In addition to this, the orientation program facilitates team building to our students and teachers, especially the new members of our Destiny Achievers family.

For this year in particular, we had our orientation program at the beginning of the term. Ochi Safaris was chosen as an appropriate venue for this year's orientation. One week was set aside for the intense program. All the students were transported to the venue and accommodation facilities were secured at the venue.

Right from the first day to the end, both students and teachers were involved in various team building activities. Some of the activities included climbing the Berlin wall, trust fall, monkey bar, spider web, balancing bar, pushing tyres, spinning tyres, tag of war. Students were organized into groups of about eight members each. All the groups competed with each other in the activities. The nature of the competitions demanded teamwork and in so doing all students and teachers interacted in order to win. By the time, the activities were through, a deep sense of oneness had been inculcated in all students .

Apart from team building, another purpose of the orientation program was to develop an awareness of essential values and ethics that are a prerequisite before engaging in meaningful learning. To promote life skills awareness, and an appreciation for psychomotor skills development, students were involved in fieldwork activities. On one of the orientation days, all the students visited the Ochi maize field for weeding. On another day, they visited the pig sties where they cleaned the pens, fed the pigs and vaccinated the piglets.

The Student Planner

One of the key events that transpired during the orientation program was the launching of the Student Planner. Designed by Extra Mile Consultancy Company, it is a guide for each student, written in the form of a book. Consultants from Extra Mile made a presentation to validate the student planner and to explain how it works. The planner helps the student to objectively plan and evaluate their work, manage their time, record their achievements, direct their own learning and development, review their progress, set targets for improvement and ultimately develop self-awareness that leads to a positive self-image and self esteem.

Our Role Model

Written by Mr. N Muyambo

She is the founder and Principal of Destiny Achievers Group of Schools. Her name is Dr. C. Gambiza. Ask her for words of wisdom, and she will tell you, "Aspire to inspire before you expire."

Inspiring others, is what her life is about. She demonstrates it with her acts of philanthropy and charity. Yes, compassionate are her acts, but she is not weak. She has an iron will, and an unwavering commitment to her vision and life's purpose.

The conception of Destiny Achievers Group of Schools in 2019 is an enduring testimony of her calling. Through Destiny Achievers School, her mission is to cater for the middle income earners. Providing upperclass education to less privileged members of the society. She lives to bridge the gap between big dreams and scarce resources.

What makes her story a wonder are the odds she had to scale before realizing the fulfillment of her dreams. She started off with just 13 students, with a vision and goals much bigger than her bank account. If it was not for her solid faith and conviction in God and his calling, she would have aborted the vision. Ask her about the trauma she has gone through , she is sure not to forget those days she endured a rough floor, the days she wore a size 38 dress instead of her 42, because the stress and poor diet had taken a toll on her. Those are the days when those people who knew her suspected that she was secretly suffering from an unknown ailment. For how else would they explain the sudden loss of weight?

But unknown to all these people, Dr Gambiza was incubating a great vision. And the excruciating labour pains were bringing forth a baby who was to be named Destiny Achievers Group of Schools. In these schools, the great leaders of tomorrow would be discovered and mentored. In recognition of her effort, an honorary doctorate degree was conferred upon this great woman of note, a woman most people would not be ashamed to call a role model, a woman we now know as

Dr. Gambiza.

TEACHER PROFILE

At Destiny Achievers we have a competitive team of teachers. Coming from a diverse background, Our teachers bring with them a wealth of experience and knowledge in their different areas of speciality. As Destiny Achievers media correspondent, I caught up with Ms Ndabambi .C for a question and answer session. This is how it went.

Q : Who is Ms Ndabambi?

A : I am a lady, young and vibrant. I am a teacher by profession. I teach Physics and Chemistry.

Q: Give us your brief academic background.

A : I did my ordinary level education at my rural school and passed all the 8 subjects I wrote. I then proceeded to do my Advanced level , and did sciences, that is Maths, Physics and Chemistry.

Q: Did you pass?

A: (laughs) Yes I did. I had 10 points.

Q: Was it that easy?

A: Oh, not at all! It was quite tough. It was a rural school and our 'A' level class was the first stream. Study resources were scarce and I had to work very hard. Moreso, to do sciences as a lady was not common. Most people felt that sciences were for boys, you know.

Q: So how did you overcome the gender-biased mentality.

A: I was focused and determined. I wanted to prove the people wrong.

Q: After 'A' level?

A: I proceeded to do Dental therapy with the University of Zimbabwe, and then a teaching diploma at Belvedere Technical Teachers College.

Q: They say school days are the best days of one's life. Do you agree and why?

A: I agree. Because I enjoyed learning. Especially the sciences.I also enjoyed competing. There is this boy that I competed with in science subjects. I wanted to prove to him that ladies can do it too.

Q: Did you finally beat him?

A: Yes I did. I managed to beat him in the final exams.

Q: What else?

A: I also enjoyed volleyball. I was a volleyball captain.

Q: On the other hand, tell me about one thing you frown about when you think of school days.

A: The day I was beaten thoroughly by my Shona teacher. I had failed a test and she suspected that I was in a relationship. I really felt angry for the false accusation. But the incident helped me to work hard and to pass Shona.

Q: You said you also did Dental Therapy. Why did you end up a teacher?

A: Circumstances. But it helped me discover myself. There was a teacher sleeping inside me, and I discovered her. I enjoy teaching immensely.

Q: When did you start teaching at Destiny Achievers?

A: March 2021.

Q: Would you recommend any parent to enrol their children at Destiny Achievers and why?

A: Certainly. Here we have dedicated teachers who work as a team. The school is growing fast. And the environment is inspiring to both teachers and students.

Q: Do you have any hobbies?

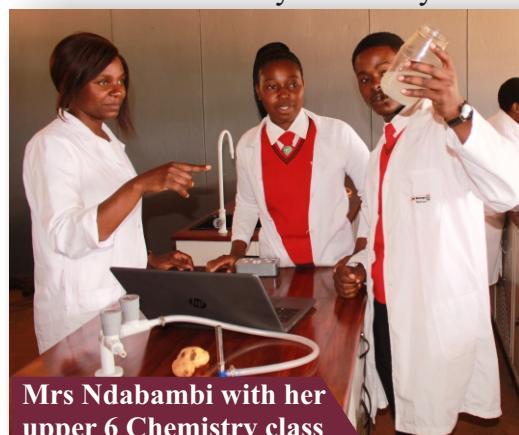

A: Yah. I love reading novels, especially fiction. Sometimes I watch movies and listen to music.

Q: Favorite dish?

A: Braai and biltong with fruit salads accompanied with 100% grape and apple juice.

Q: Advice to Students at Destiny Achievers?

A: Work hard to achieve your destiny!

Mrs Ndabambi with her upper 6 Chemistry class

LIFE SKILLS

Written by :
Tafadzwanashe . T Mashonganyika
Upper 6

Mr Muyambo demonstrating the fertilisation of maize during a farming life skills session.

At Destiny Achievers we believe in hard work. Both students and teachers give their best in what they do. Our Principal, Mrs Gambiza is a workerholic . She believes the only way to achieve one's destiny is by working hard. She has set the pace for all of us at Destiny Achievers, especially us the students.

Mrs Gambiza says, "As they are, so was I, as I am so they can be, but they need to be determined and focused. So in line with this principle, She has conceived a life skills program aimed at equipping all students with special skills relevant for survival. True to the word, our world has become very competitive and challenging and one can not make it if they have a skills deficiency.

As our newsletter shall depict in this edition and others that will follow after it, one critical life skill shall be demonstrated and published. Our teachers whose knowledge of various life skills is deep and solid, are our resource persons. External experts on key life skills are going to be invited for live demonstrations and instructions.

Our principal has already introduced compulsory driving lessons for all students.

Students who find themselves on the wrong side of our school rules are usually given tasks that make them productive while at the same time acquiring life skills. This is achieved by working in our school plot where various crops are grown.

Do's and Dont's

By Mr. N Muyambo

When you enrol at a school, it is important to know your reason for being there. It is of paramount importance to define your goals clearly so that you are not led astray by forces that attack the youth during adolescence.

One of the things that youths are subjected to is the pressure to do love affairs at school. Some do it in response to peer pressure while others give in to the dictates of hormonal impulses that indiscriminately attacks them during the onset of puberty.

At Destiny Achievers, involvement in love affairs is a gross act of misconduct. Our Principal and all teachers do not condone such misguided acts. Among the Do's and Don'ts of the school, love affairs are strictly a **DON'T**.

Those students who choose to disregard this policy, always find themselves victims of their own foolishness. The disciplinary committee always heed the call to duty.

So to those students new in the school, please take heed. Flee the folly of youth and focus on the reason why you are at school, which is to learn.

Historically, girls have always been the victims of misguided boys who would pester them with proposals for love relationships. But of late, girls have been known to join in. Directly or indirectly, some girls are luring unsuspecting boys into these premature affairs.

It is therefore important that you be on your guard for these unruly elements whether you are a girl or a boy.

The Word of God says there is time for everything. Love affairs are meant for the mature, who have taken their time to prepare for a stress-free future. Young people are advised to commit their time to achieving academic goals, resolutely focused on education.

If you work hard on your books and pass your exams, you have booked a ticket to a happy life. Navigating the rugged terrains of your life's journey becomes easy. So young people, DON'T be caught unawares.

Zero Tolerance To Love Affairs

Mind Your Health

A healthy body and a healthy mind are key for effective learning. That's why at Destiny Achievers we have a fully functioning health services department. Our department is manned by two nurses, Mrs Masariranwa operates from the senior school while Mrs Chitate operates from the junior school. Both schools have isolation rooms well designed to attend to all health issues affecting students and staff, especially in this COVID-19 era.

Compliance With COVID-19 School Guidelines

In this COVID-19 era, it is important for schools to comply with the ministry of health standards for dealing with the pandemic in schools. Here at Destiny Achievers School, our health department works around the clock to ensure that our students and staff are safe from the disease. Each morning, we carry out a COVID-19 test on each student as they enter classrooms. Temperature checks are conducted on visitors as they enter school premises. The school provides each student with a personal face mask which is worn every time. Students and staff members are encouraged to sanitize regularly. Anyone with colds or suspicious ailments are taken to the isolation room for tests and isolation at the earliest possible time.

Other Services Offered

Apart from ensuring a COVID-free environment at our school, we also attend to our students' day to day ordinary health needs. These range from ordinary flues triggered by cold weather conditions, stomach pains, head aches, minor sprains and injuries experienced by students during sports. We also attend to emergencies if any, and decide if casualties need specialized attention at a hospital. To sum it up, we encourage everyone to be health conscious to ensure a disease-free environment.

Top left: Student washing hands with sanitizer.

Bottom left: Mrs B. Matariranwa (the nurse) attending a student

Bottom right: Mrs D. Chitate (nurse) doing regular temperature checks

Embracing Science and ICT At Destiny Achievers School

By Mr Muyambo

Destiny Achievers School offers a diverse and stimulating curriculum. Three academic departments offered are the Sciences, Arts and Commercials. Both the Cambridge and

Zimsec Syllabi are taught. In this month's publication, we are going to put the ICT and Sciences department under the spot light.

The Science department offers Combined Science to form ones and two. Forms three, four and 'A'levels do Physics, Chemistry and Biology . Maths and Geography are compulsory for all students.

Recently, the school purchased mobile science labs that are tailor-made to make the learning of science subjects easy. Teachers can now conduct and demonstrate experiments easily. The teaching of science concepts is also simplified by the use of audio-visual aids such as laptops and projectors

The Science department has a team of dedicated teachers. These are: Mr Mubani (Maths), Mr Ndabambi (Physics and Chemistry), Mr Muyambo (Maths and Geo) Mr Sekete (Geo), Mr Kanyera (ICT) Mr Chakanza (Biology)and Mr Munakandafa (Combined Science, Physics and Chemistry)

Science quiz
Who invented the first light bulb?

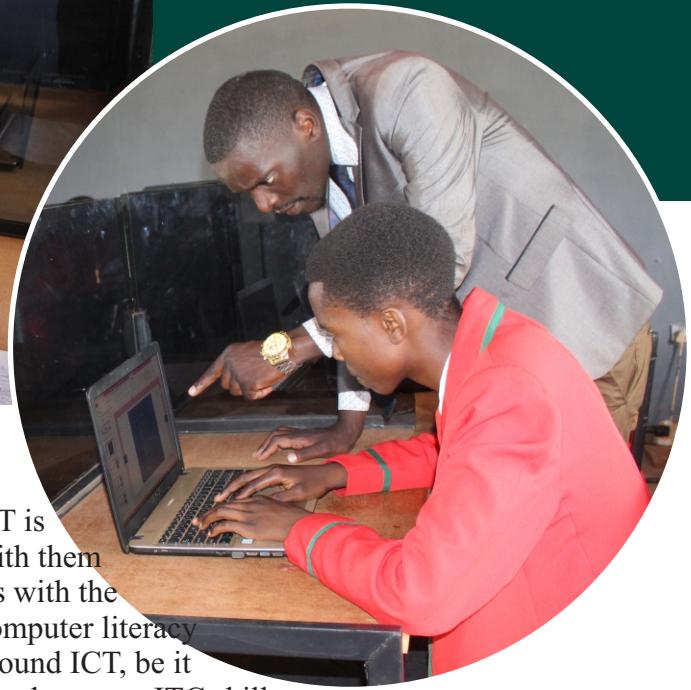

Top: Upper 6 Chemistry students with their teacher Ms Ndavambi (extreme left) doing experiments in the laboratory.

Left and below: Upper 6 students going through an ICT lesson with Mr Kanyera.

Information and Communication Technology (I.C.T)

At Destiny Achievers group of Schools , the learning of ICT is compulsory to all students. All students are required to bring with them an ICT gadget upon enrolment. This helps to equip our students with the relevant skills needed in this information dependent society. Computer literacy is now a must have in this age. All facets of life now revolve around ICT, be it social life, education, industry, commerce and entertainment. Furthermore, ITC skills help our students in accessing information for other subject areas via the internet,

It is disheartening to note that many students go through the schooling process, some even reaching 'A' level, without deciding on the career path they want to follow. Some even proceed to university only to decide on the basis of their results the degree program they would follow.

The main reason for this crisis is usually lack of information and exposure pertaining to careers. It is against this background that the media team came up with the idea of publishing one career per month in order to keep students informed.

Our aim is to help students get all the relevant knowledge on what academic subjects, qualifications, talents, courses and psychomotor skills that they should have to be successful in careers of their choice. They say knowledge is power, and they need it to make it in life

Travel and Tourism is an amazing and interesting subject which is being done at Destiny Achievers School. At present, there are 13 upper six students that are studying Travel and Tourism. This subject helps students who want to pursue a career in the fast growing tourism industry. In this subject, people are taught to explore the world from many perspectives. It involves the study of people's movement to destinations outside places where they live and work.

Travel and tourism study guides

Students may use these study guides as they prepare themselves for the exams while at the same time getting important career insights.

- * Downloading and playing video tutorials

- * Visiting tour operators' websites for services offered and possible job opportunities
- * Doing regular field trips to the local tourism-related companies such as hotels, travel agents and the Zimbabwe Tourism Authority.
- * Reading Travel magazines and newspapers
- * Study groups

Opportunities in Travel and Tourism

There are so many career paths that students can follow in the travel and tourism industry.

These include:-

- * travel agents
- * pilots
- * air hosts
- * butlers
- * tour operators
- * tour guides

The Travel and Tourism class posing for a photo

GETTING SPIRITUAL

By Mr V. Sekete and De-Angelo Kawani

Mr Sekete

Mr Rambo

Mr Munakandafa

Students listening
to the sermon
attentively

Sermon time
during a
Prayer Convention
service

One of the fundamental pillars of our success at Destiny Achievers group of schools is our strong moral values. These moral values are strengthened by the christian environment that we so cherish at our schools. We have a very vibrant Scripture Union which organises Sunday Services and one prayer convention every term.

For this term, the prayer convention was held from Friday the 12th to Sunday the 14th of March. All the students and

nearly all the teachers attended. It was a power-packed and life-changing convention .Five preachers converged at the convention to share their wisdom and knowledge on a wide range of issues pertaining to the spiritual, social, academic and career development of students and teachers. Parents were also invited and more than ten parents graced the occasion, much to the enjoyment of the students.

The Kingdom of God By Overseer Msiza

Overseer Msiza gave a powerfull teaching about the kingdom of God. First, he explained that there are two kingdoms, the kingdom of God (ruled by God) and the kingdom of darkness (ruled by Satan). He explained that though most people- students included- would want to do good things in life, it is the kingdom of the darkness that contributes them to failure. So to overcome this evil kingdom, one must be saved and be a member of the kingdom of God. Only through God can one achieve true success in life. After the preaching, 27 students gave their lives to Christ.

Entrepreneurship: By Dr Johns

Dr John gave a challenging and motivating teaching on the subject of entrepreneurship. He gave his life testimony first. He told the congregation that due to financial challenges, he failed to achieve academic success. However, this did not deter him from pursuing his dreams. He enroled at Msasa Vocational Training Center where he trained as a mechanic. Afterwards he started his own company, specializing in auto-mechanics.

Using his personal life story, he challenged students to pursue entrepreneurship as a career. He emphasized that good character is key to being a successful entrepreneur.

Dr John

Dr. C. Gambiza

Grooming and Deportment By Doctor C. Gambiza

Dr C. Gambiza, the founder and Principal of Destiny Achievers Group of Schools, also made a very inspiring and informative presentation. She taught about grooming and deportment. In her presentation, she emphasized the need to be well presented at all times. Dr Gambiza used a role play to illustrate both good and bad grooming and the subsequent effect of each in real life situations.

According to Dr Gambiza's teaching, well groomed people have more chances of securing jobs during interviews than more qualified counterparts who are poorly groomed. In her conclusion, she asserted that first impressions really matter and that one needs to make sure they look their best.

Topic:Character By Pastor Chihombori

Pastor Mrs Chihombori, who together with her husband are the pastor in charge of the Scripture Union at Destiny Achievers School, preached on Friday and Sunday. In her preaching she underscored the importance of having good character and a positive attitude. She asserted that though one good character may be successful in life, it is character that helps you maintain that position of success. She encouraged the students to have a teachable spirit and to avoid the temptations that derail most people from achieving their life goals and aspirations.

Message Title :Preparation By Elder Maone

Basing his teaching on a scripture reference from the book of Matthew Chapter 25, Elder Maone encouraged students to prepare for life. He told the students that they were at Destiny Achievers to learn so that they would prepare for their lives. Just like the proverbial five foolish girls who did not prepare for the coming of the bridegroom, students who waste their time at school will realise the need for education when its too late. He used an illustration to demonstrate how poverty would attach them if they failed to work hard at school.

YOUNG & TALENTED

Reported by Mufaro Chikanda

At Destiny Achievers school, we have so many talented young people. As Media Team we will be bringing you the work of these talented young people in each edition of this publication.

These young people have different gifts and most of the time the gifts die unknown. This magazine shall be a platform for discovering tomorrow's next generation of poets, authors, artists only to name a few.

I caught up with three young people whose creative efforts deserves to be published. Here they are.

**Short Story
By Mufaro Chikanda**

The Day Before the interview

It was a calm summer day when Mr Sibanda received the call. It was a highly anticipated call. It came from one of the most sort after accounting firms in the whole city of Harare.

Mr Sibanda jumped with joy, knowing he had been called for an interview in a few days.

Four days letter, Mr Sibanda got into town to buy himself a new suit for the interview scheduled for the next day.

As he walked through the door of the first shop, the owner said they

only had one suit left which was also too big. He went to the next shop and they only had suits for toddlers. As he was heading to the fourth shop, which was about to close, he met an old frail woman with a baby in her arms, begging for money.

Mr Sibanda did not hesitate. He gave the woman the money to buy herself and her baby enough food for three days. Before Mr Sibanda left, the old woman grabbed his arm and whispered, " Whatever your desires are, the Lord grant them unto you." He thanked her and went home.

Upon arrival home, he saw that his wife had sown him a new suit.

The next day he went to the interview only to be told he had given the job and no interview was done!

Our Only World

Our work is here, lets do it.

Today is ours, lets live it.

And love is strong, lets give it.

A song can help, lets sing it.

The road is rough, lets smoothen it.

The battle is hard, lets fight it.

Education is important, lets have it.

The we can enjoy our stay, on our only world.

SPORT

A FORCE TO RECKON WITH

By The Sports Captain- Jojo

At Destiny Achievers we do a variety of sports which include soccer, volleyball and athletics. These sports are compulsory for all students.

Tuesday and Thursday are our sports days. Inter-house competitions are done at ZB Bank grounds.

These events are filled with joyous participation among all students. In 2022 several events are line-up.
